PROFILE

Final-year B.Tech Artificial Intelligence & Data Science student (CGPA 9.21/10) with hands-on experience across the full data lifecycle — SQL data modelling and ETL pipelines, machine learning model development and deployment, and business intelligence reporting. Comfortable moving between raw data, production ML systems, and the dashboards decision-makers rely on. Seeking a Data Analyst, Machine Learning Engineer, or Data Engineer role.

TECHNICAL SKILLS

Programming & Databases: Python, SQL, PostgreSQL, Git/GitHub

Data Engineering & Analytics: ETL Pipelines, Data Modelling, Star Schema, Data Warehousing, Data Cleaning & Validation, Exploratory Data Analysis, KPI Design, Power BI, DAX, Advanced Excel

Machine Learning & Deep Learning: XGBoost, Logistic Regression, CNNs, Feature Engineering, Class Imbalance Handling, Hyperparameter Tuning, SHAP Explainability

Computer Vision & LLM: OpenCV, MediaPipe, Image Classification, Real-Time Inference, LLM Integration (Groq / LLaMA), Speech-to-Text & Text-to-Speech, Prompt Engineering, WebSockets

MLOps & Frameworks: MLflow, FastAPI, Automated Retraining, Docker, GitHub Actions CI, Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Streamlit.

KEY PROJECTS

CreditGuard — Credit Risk Scoring & Monitoring Platform

Tech: Python, XGBoost, Scikit-learn, SHAP, MLflow, FastAPI, PostgreSQL, Streamlit, Docker

- Predicts 12-month probability of default across 50,000 applicant records, returning a 300–900 credit score with an Approve / Review / Reject decision and SHAP reason codes.
- Covers the full ML lifecycle — data validation, feature engineering, MLflow-tracked training, FastAPI scoring, PSI drift monitoring, and automated retraining — across five Docker services with GitHub Actions CI.

Enterprise Sales Analytics Dashboard

Tech: PostgreSQL, SQL, Power BI, DAX, Excel

- Modelled a star-schema data warehouse of 4 fact and 7 dimension tables over 250,000 orders, 20,000 customers, and 1,000 products.
- Delivered three interactive dashboards — executive KPIs, sales performance, and customer/product analytics — with custom DAX measures and drill-down filtering.

Real-Time Voice AI Agent

Tech: Python, Groq (LLaMA 3.1 / 3.3), Deepgram Flux & Aura-2, WebSockets, asyncio

- Streams speech-to-text, LLM inference, and text-to-speech over persistent WebSockets, engineered to a sub-2-second end-to-end response target.
- Benchmarked per-stage latency to isolate the bottleneck, then overlapped TTS synthesis with token generation via sentence-level streaming.

SignMindX — Real-Time Gesture Recognition System

Tech: Python, OpenCV, MediaPipe, NumPy, PySide6

- Classifies 21-point 3D hand landmarks into OS-level actions in real time on CPU-only hardware, with no GPU required.
- Reduced false positives using EMA smoothing and majority-vote temporal filtering, on a multi-threaded capture / inference / execution architecture.

EXPERIENCE

Data Analyst & Web Development Intern — GoldMoon Group, Ramanathapuram, India

March 2026 – April 2026

- **Developed** and deployed the company website using HTML, CSS, and JavaScript as the organisation's primary online presence.
- **Produced** data analysis reports for management, consolidating operational data into summary metrics and visualisations supporting business decisions.

Data Analyst Intern — EagleTech Solutions, Chennai, India

June 2023 – July 2023

- **Consolidated** five years of Tamil Nadu road accident records from government and public sources into a single analysis-ready dataset of 20,000+ rows.
- **Executed** data cleaning, deduplication, and validation workflows, producing datasets used for accident hotspot and multi-year trend analysis.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

2022 – 2026

B. S. Abdur Rahman Crescent Institute of Science and Technology, Chennai, India | **CGPA: 9.21 / 10**

CERTIFICATIONS

- Complete Python Bootcamp — Udemy
- PostgreSQL Essential Training — LinkedIn Learning
- Master Microsoft Excel — LinkedIn Learning
- Linguaskill (Cambridge English) — CEFR C1
